### CISIA: A New Industry Research Center

After a year-long competition, LSU and Louisiana Tech are now finalists for a National Science Foundation center built for one purpose: *help companies improve safety, resilience, and productivity through industry-relevant research in areas related to structural integrity such as wear & tear, fatigue, component failure, prediction, testing, analysis, remediation, sensing, and materials.*

### About The Workshop

All CISIA research projects and focal areas are chosen by industry based on their relevant needs. This workshop has 3 goals:

#### CONNECT INDUSTRY CENTER PARTNERS

Meet other prospective industry members, the CISIA team, and leadership at both universities and NSF

#### YEAR 1: PROPOSED RESEARCH PROJECTS

Provide feedback on and shape CISIA's first round of proposed industry research projects under the center

#### CENTER MEMBERSHIP

Learn more about CISIA's research capabilities, center membership, and available support and features
