

Manufacturing is critical to a strong regional economy—and there's great opportunity for innovation and growth

Colorado Manufacturing Facts:

Over 140,000 employed* Over \$21B in economic output*

EWI looks forward to helping those numbers continue to grow.

EWI Colorado is a new center for advanced process monitoring and control technologies that will help regional manufacturers be more competitive

Building

upon existing capabilities in Columbus and Buffalo, EWI Colorado will focus on developing and maturing technologies to improve first-time quality through:

- Real-time manufacturing process monitoring and analysis
- Advanced nondestructive evaluation
- Computer vision inspection
- Non-contact metrology
- Structural health monitoring

Partnering

with economic development organizations to advance and strengthen manufacturing across the region

- Colorado Advanced Manufacturing Alliance (CAMA)
- Colorado Office of Economic Development and International Trade (OEDIT)
- City of Loveland, CO

Connecting

to manufacturers across the state through FourFront Colorado's FUSE Centers

Members have access to all EWI lab facilities, technical disciplines, manufacturing tools, and engineering resources throughout our extended network

EWI's new location in the west means new opportunities and technical capabilities available to our customers. We're growing to help you grow your business. Contact us at info@ewi.org or 614.688.5000 to learn more.
