

Fundamentals of Nondestructive Testing

An EWI Online Micro-credential Course

The **Fundamentals of Nondestructive Testing (NDT)** course provides students with an introduction to nondestructive examination methods and applications. It focuses on three specific testing modes: *surface inspection*, *radiography*, and *ultrasonics*. Upon completion, students receive a micro-credential certificate in nondestructive testing and 22.5 PDH credits.

This EWI online course is made available to students via the CWB Learning Resources Platform. All content and supporting resources are accessible from anywhere through a single portal, including lessons, activities, exams, links to articles, digital textbooks, and more.
