

8 Things You Should Know About EWI Membership

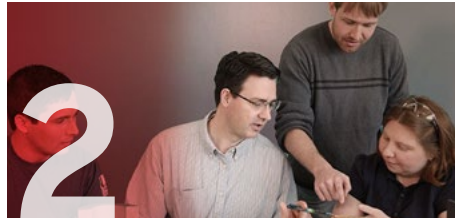

EWI membership gives your organization access to some of the world's best engineers, technicians, and scientists dedicated to developing, testing, and implementing new technologies—and increasing your competitive advantage in the marketplace.

But do you know what you actually get when you become a member of EWI?

1 TECHNICAL INQUIRIES

You have access to 100+ engineers with decades of experience for day-to-day technical support.

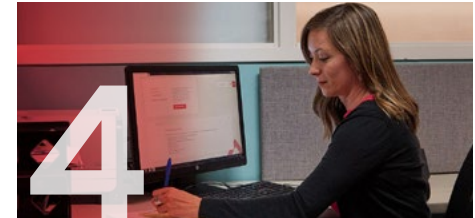

2 DESIGN REVIEWS

Bring us your design, production problem, or manufacturing process challenge, and we'll match your team with EWI staff who can help.*

3 LIBRARY: LITERATURE SEARCHES

Do you need a quick survey of publications related to your technology, materials, or process issue? Our library has access to more than 30 million abstracts.

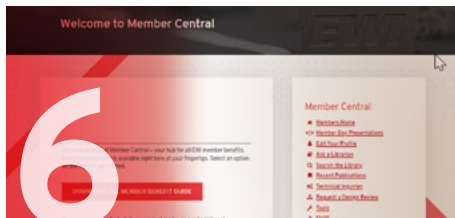

4 LIBRARY: ARTICLE RETRIEVALS

Request the articles you want to receive, and our librarians will get back to you within 1-2 business days. This is an unlimited service with no charge to member companies.

5 MEMBERS-ONLY PUBLICATIONS

Get newsletters, reports, and papers on technology developments, methods, and breakthroughs, as well as inside views and industry news from EWI's leadership team.

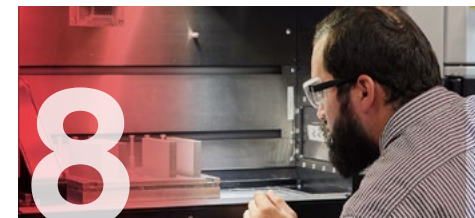

6 MEMBER CENTRAL WEBSITE

Your online portal lets you link directly to our engineers, submit design reviews and literature search requests, view member-exclusive content, and more.

7 CYBER RISK ASSESSMENT

All EWI members are eligible for a free Cyber Risk Assessment through the National Association of Manufacturers (NAM) Cyber Cover program. This service will evaluate your company's vulnerability and identify weaknesses that could make you a target for hackers.

8 ENGINEERING SITE VISIT

Take advantage of a full-day, onsite consultation from an EWI technical specialist. Services can include design reviews, process evaluations, manufacturing audits, and technical guidance. We also provide a summary of findings, identified opportunities, and recommended next steps.*

“The world-class knowledge that exists within the EWI staff is paramount. Their expertise is worth so much more than base-level academic research.”

-VP of Automotive Engineering at a developer of advanced high-strength steels

**Available at most membership levels*
